

What's in store for enterprise makers?

with FintechOS 22

Remco Jorna, CTO

Enterprise Makers and FintechOS 22

- **What our clients told us**
- **Essential technical capabilities for low-code application platforms driving our investments**
- **Eight critical capabilities for digital financial enterprises**

What our clients and partners told us

We love your technology ...

What our clients and partners told us

We love your technology ...

- FintechOS is a competitive solution, which gives us the advantages of developing very fast

What our clients and partners told us

We love your technology ...

- FintechOS is a competitive solution, which gives us the advantages of developing very fast
- FintechOS is user-friendly & intuitive for both front and back-office processes

What our clients and partners told us

We love your technology ...

- FintechOS is a competitive solution, which gives us the advantages of developing very fast
- FintechOS is user-friendly & intuitive for both front and back-office processes
- FintechOS is super easy to configure to support our business outcomes, associated needs, and specifications

What our clients and partners told us

We love your technology ...

- FintechOS is a competitive solution, which gives us the advantages of developing very fast
- FintechOS is user-friendly & intuitive for both front and back-office processes
- FintechOS is super easy to configure to support our business outcomes, associated *needs* and specifications
- I've worked with other technologies that have some overlap with what FintechOS is proposing, and I can confidently say that the flexibility of the FintechOS platform is better

What our clients and partners told us

We love your technology ...

- FintechOS is a competitive solution, which gives us the advantages of developing very fast
- FintechOS is user-friendly & intuitive for both front and back-office processes
- FintechOS is super easy to configure to support our business outcomes, associated **needs** and specifications
- As I have worked before with other technologies, similar to what FintechOS is proposing, I can confidently say that flexibility of the FintechOS platform is better

... and we have some suggestions

What our clients and partners told us

We love your technology ...

- FintechOS is a competitive solution, which gives us the advantages of developing very fast
- FintechOS is user-friendly & intuitive for both front and back-office processes
- FintechOS is super easy to configure to support our business outcomes, associated *needs* and specifications
- As I have worked before with other technologies, similar to what FintechOS is proposing, I can confidently say that flexibility of the FintechOS platform is better

... and we have some suggestions

- We need additional capabilities to support complex, large-scale implementations of digital journeys for controlling versions, configurations and moving them between environments

What our clients and partners told us

We love your technology ...

- FintechOS is a competitive solution, which gives us the advantages of developing very fast
- FintechOS is user-friendly & intuitive for both front and back-office processes
- FintechOS is super easy to configure to support our business outcomes, associated *needs* and specifications
- As I have worked before with other technologies, similar to what FintechOS is proposing, I can confidently say that flexibility of the FintechOS platform is better

... and we have some suggestions

- We need additional capabilities to support complex, large-scale implementations of digital journeys for controlling versions, configurations and moving them between environments
- We want to use FintechOS in a headless mode, using the power of the platform but connecting it to our own apps and portals

What our clients and partners told us

We love your technology ...

- FintechOS is a competitive solution, which gives us the advantages of developing very fast
- FintechOS is user-friendly & intuitive for both front and back-office processes
- FintechOS is super easy to configure to support our business outcomes, associated *needs* and specifications
- As I have worked before with other technologies, similar to what FintechOS is proposing, I can confidently say that flexibility of the FintechOS platform is better

... and we have some suggestions

- We need additional capabilities to support complex, large-scale implementations of digital journeys for controlling versions, configurations and moving them between environments
- We want to use FintechOS in a headless mode, using the power of the platform but connecting it into our our apps and portals
- **We have new requirements when it comes to security and compliance. We'd like you to run FintechOS for us in a high availability setup while complying with EBA requirements**

What our clients and partners told us

Software Development Lifecycle

What is it?

Software Development Lifecycle

What is it?

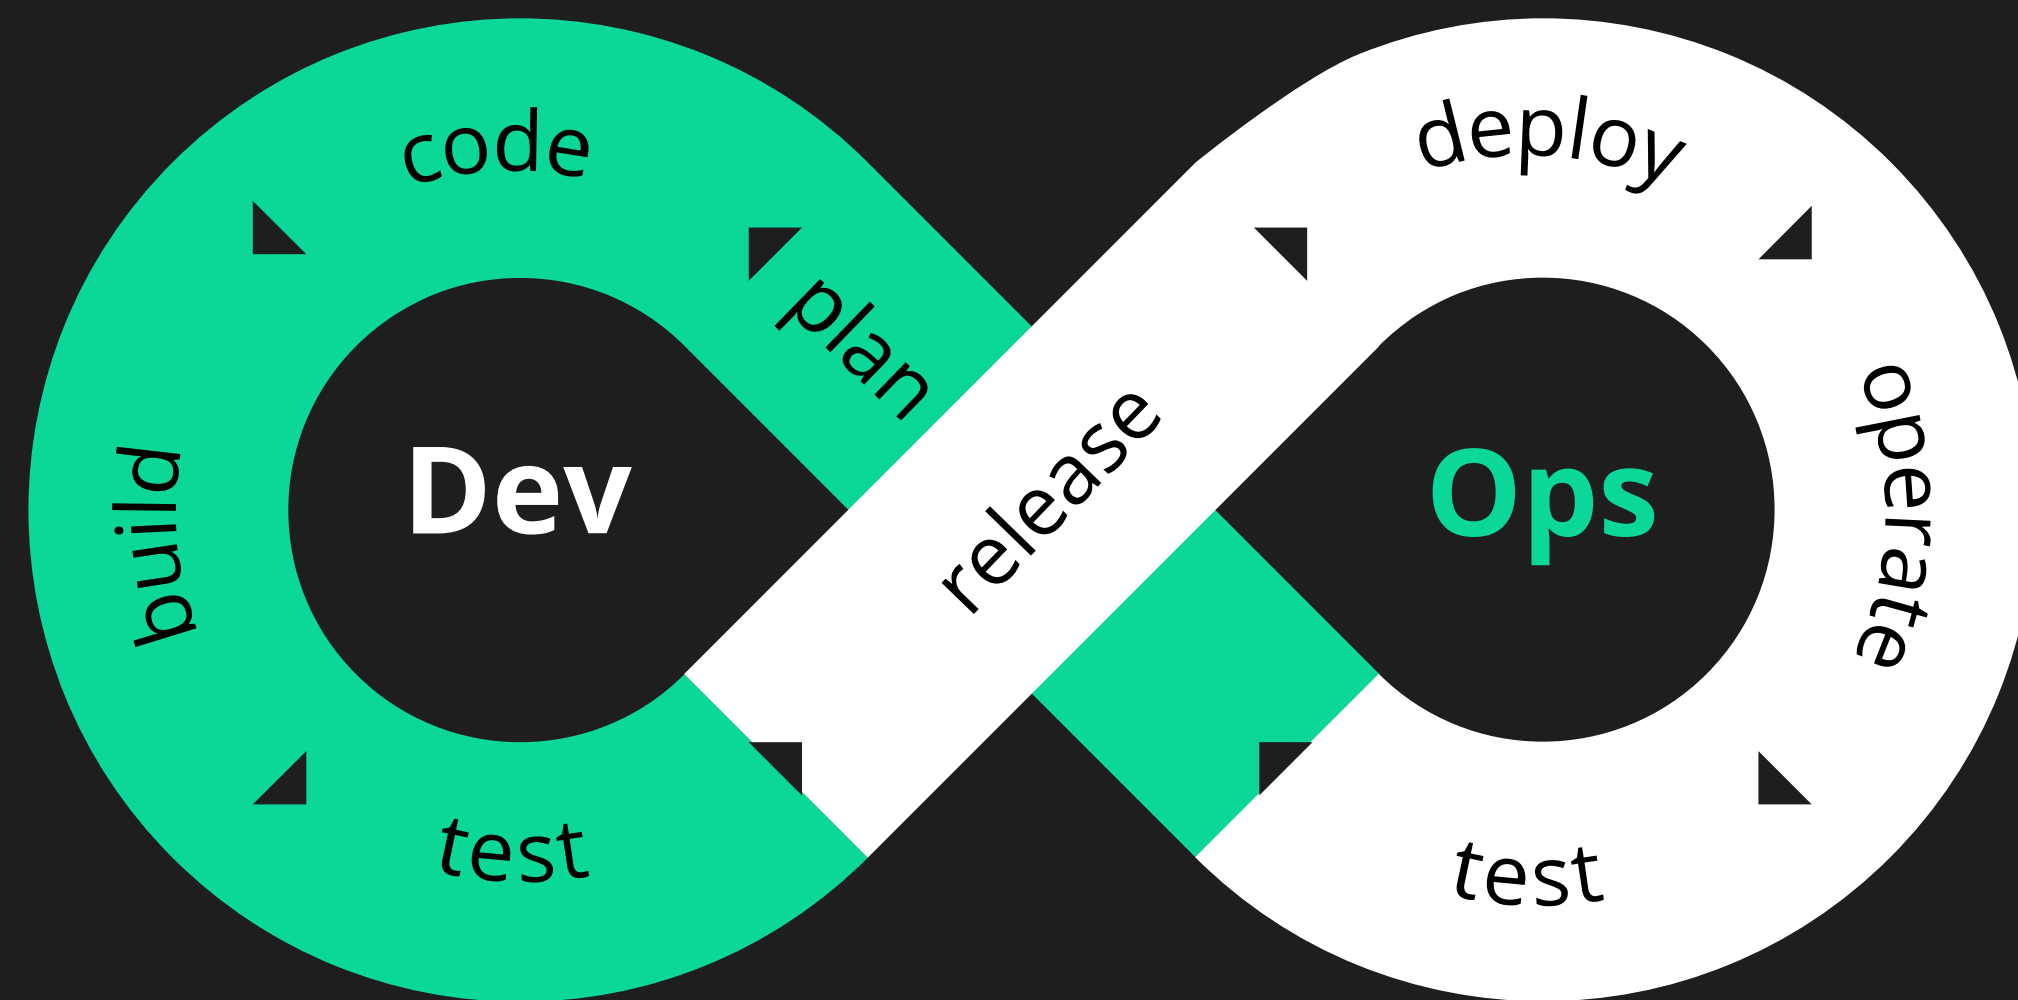

Enhanced capabilities

- A redesigned system for configuration and version management which allows for improvements in collaborative development, and partial releases

Software Development Lifecycle

What is it?

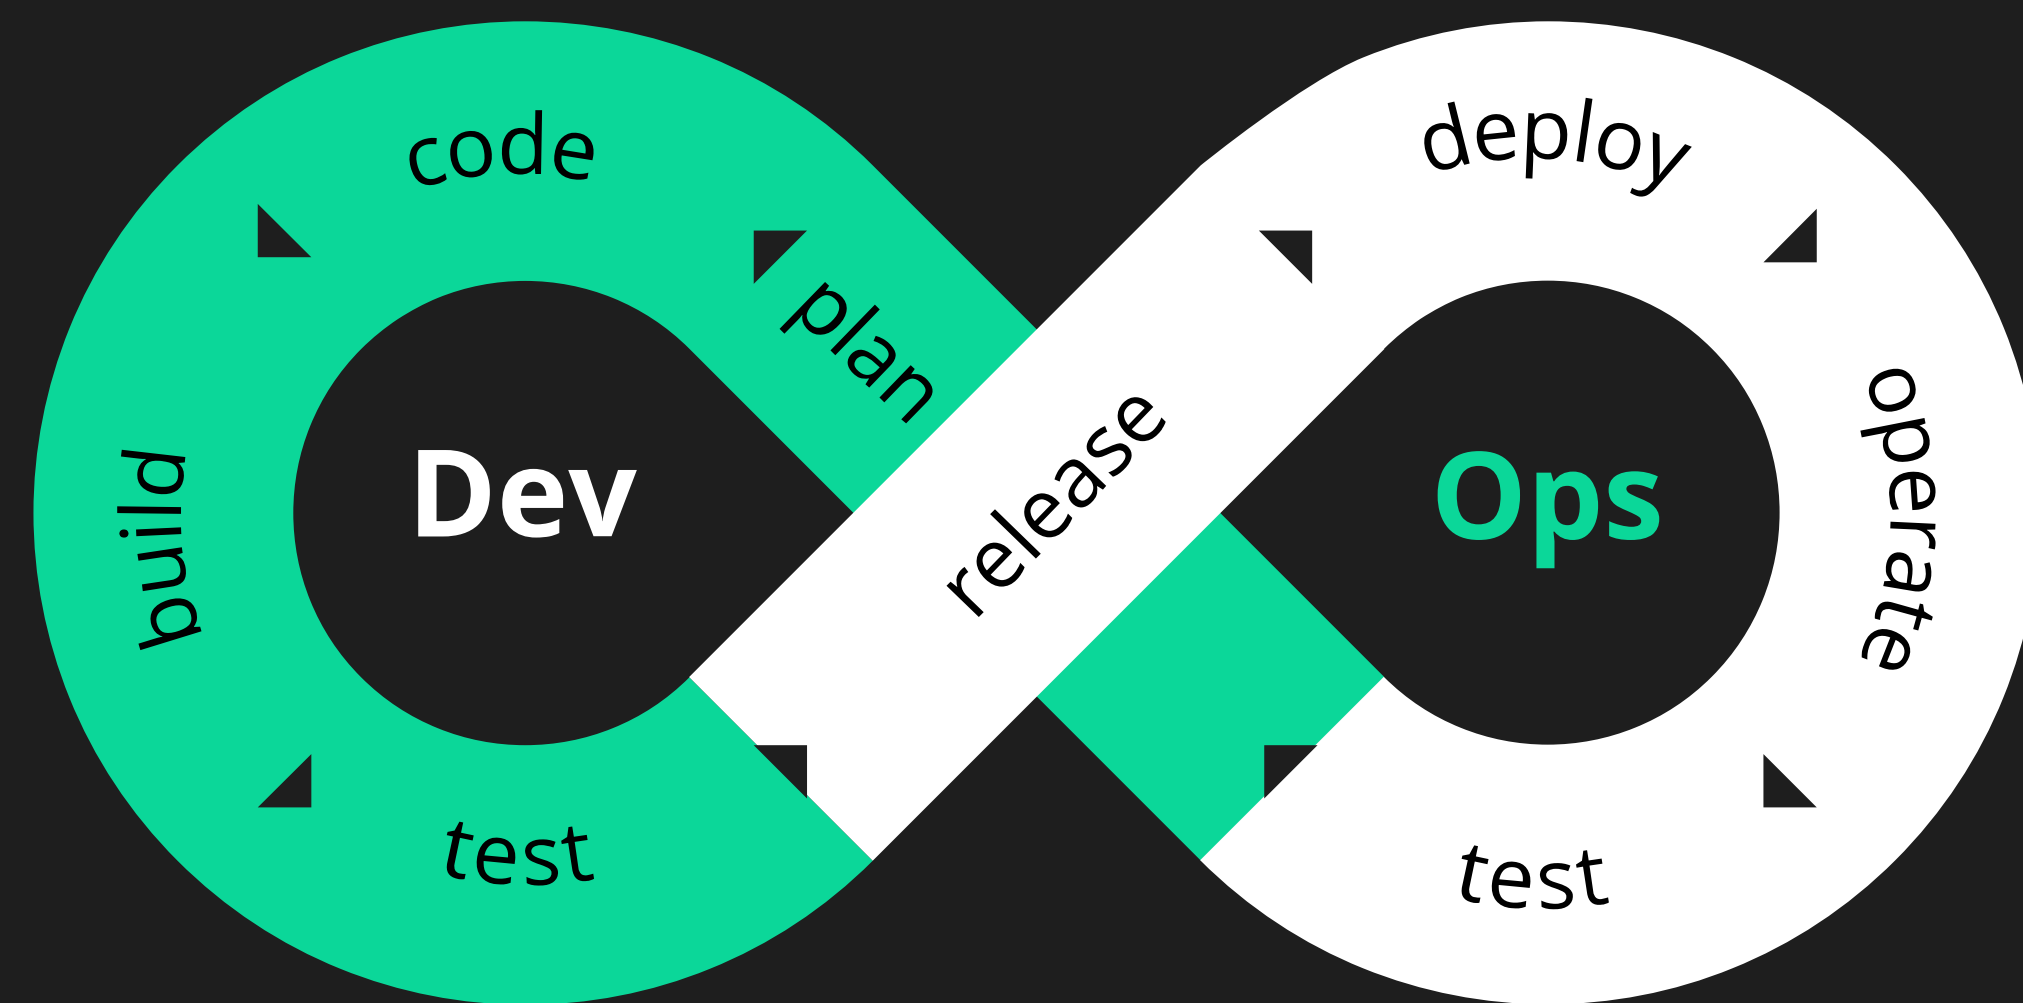

Enhanced capabilities

- A redesigned system for configuration and version management which allows for improvements in collaborative development, and partial releases
- Deploy with ease from one environment to another. This cuts down deployment times to minutes.

Software Development Lifecycle

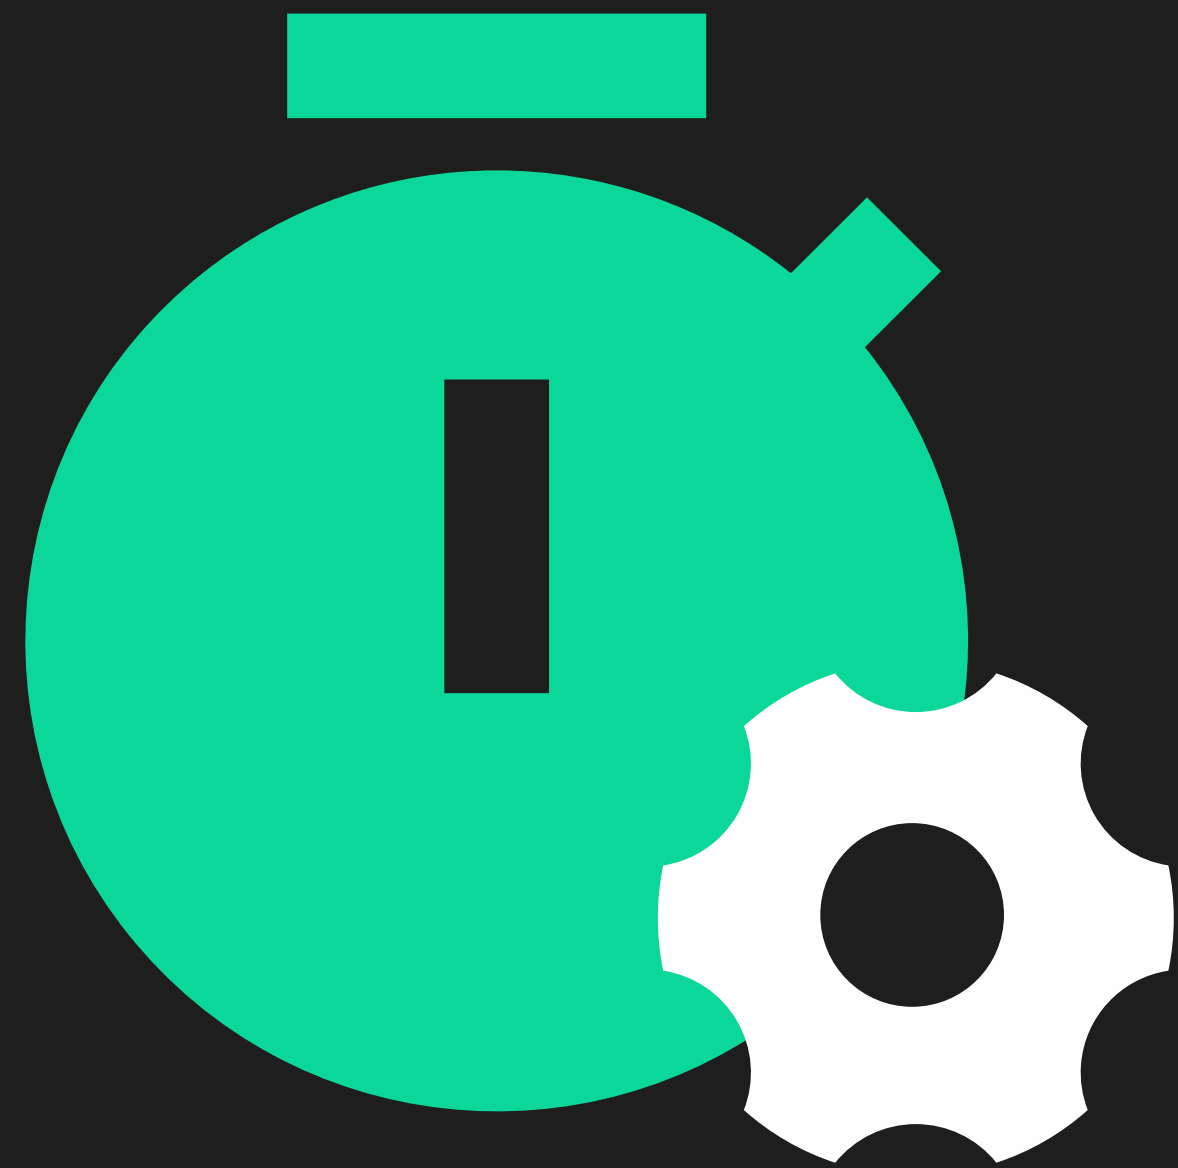

What is it?

Enhanced capabilities

- A redesigned system for configuration and version management which allows for improvements in collaborative development, and partial releases
- Deploy with ease from one environment to another. This cuts down deployment times to minutes
- Major extension to how we collect data on platform behavior and the amount of data being collected, bringing new options to improve solutions build with FintechOS

Developer productivity

Enhanced capabilities

- A fresh Innovation Studio that improves developer experience and requires fewer clicks to build solutions

Developer productivity

Enhanced capabilities

- A fresh Innovation Studio that improves developer experience and requires fewer clicks to build solutions
- 50% improvement in Innovation Studio response times which improves the time to results

Developer productivity

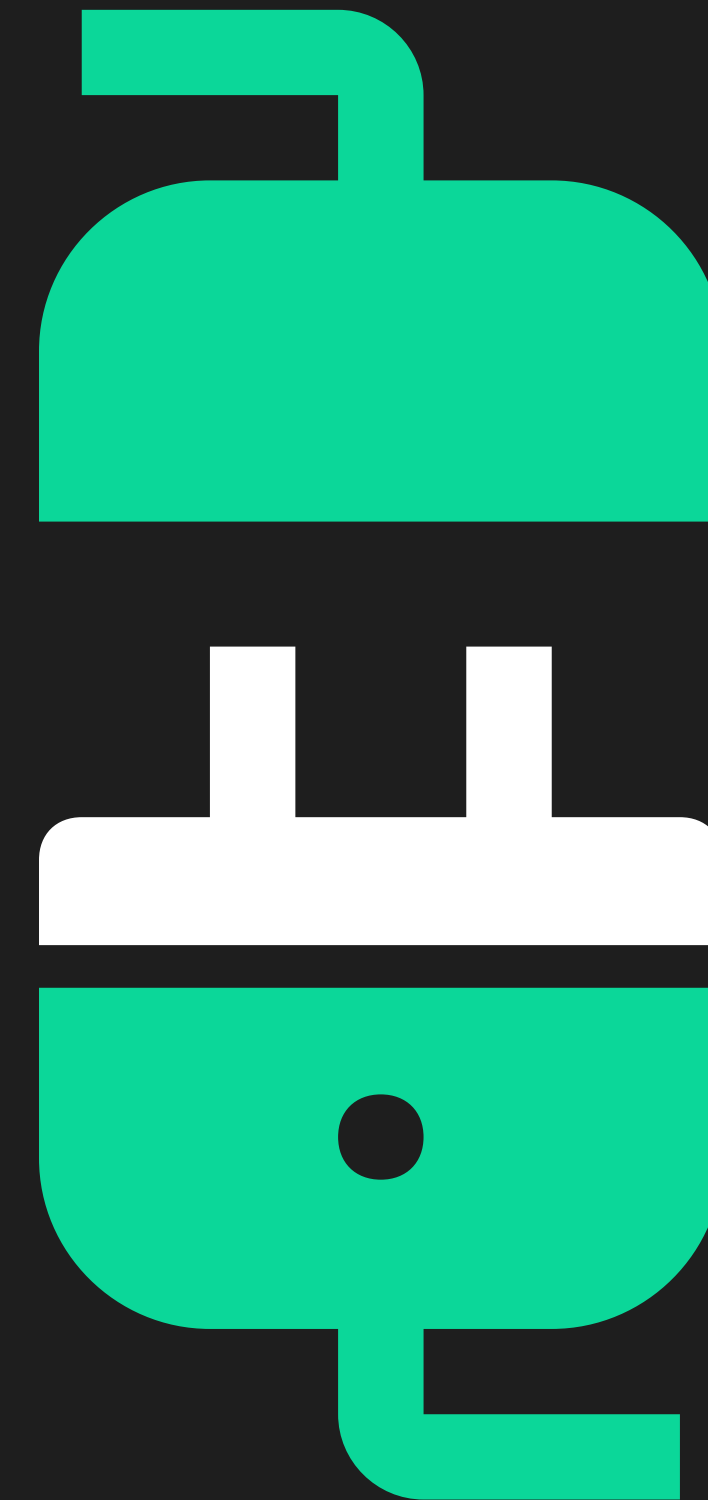

Enhanced capabilities

- A fresh Innovation Studio that improves developer experience and requires fewer clicks to build solutions
- 50% improvement in Innovation Studio response times which improves the time to results
- Code quality checking of low-code that is created when developing solutions using external systems

Integration and API's

Enhanced Capabilities

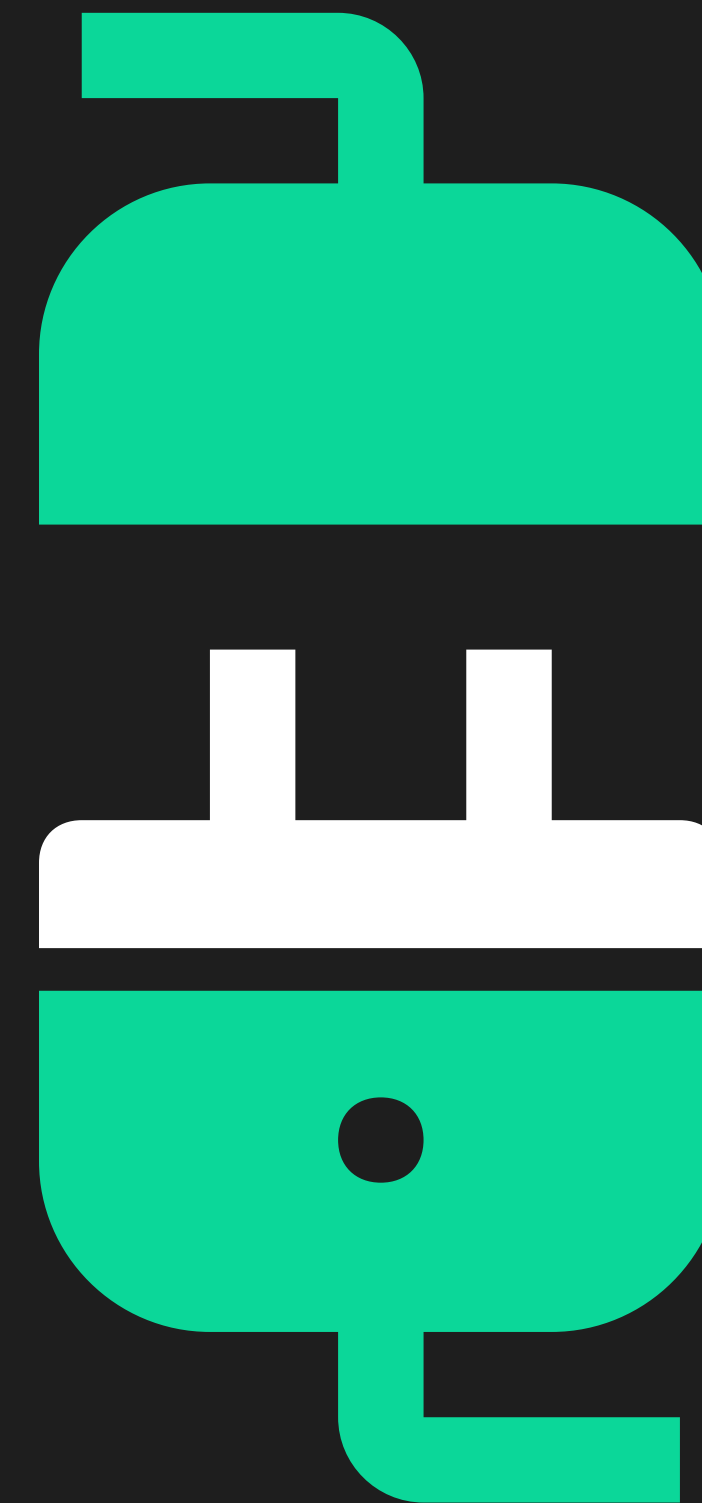

- API-enabled FintechOS capabilities allows you to use your existing apps and portals and benefit from the power of FintechOS Digital Journeys and the Evolutive Data Core

Integration and API's

Enhanced Capabilities

- API-enabled FintechOS capabilities allows you to use your existing apps and portals and benefit from the power of FintechOS Digital Journeys and the Evolutive Data Core
- Enhanced capabilities for connecting into your existing enterprise and 3rd party SaaS solutions including sync, async and event-driven architectures

Security and Quality of Service

Authentication and Authorization

- Revamped identity management environment that's compliant with industry standards like FIDO2, OpenID Connect, SAML

Security and Quality of Service

Authentication and Authorization

- Revamped identity management environment compliant with industry standards like FIDO2, OpenID Connect, SAML
- Connectivity into your existing Identity Platforms like Azure AD and Okta with extensions into 3rd party solutions to support Strong Customer Authentication

Security and Quality of Service

Authentication and Authorization

- Revamped identity management environment compliant with industry standards like FIDO2, OpenID Connect, SAML
- Connectivity into your existing Identity Platforms like Azure AD and Okta with extensions into 3th party solutions to support Strong Customer Authentication
- Single solution for securing the apps, portals and APIs delivered as part of your FintechOS solution.

Security and Quality of Service

FintechOS Cloud

- FintechOS running your solutions using the power of cloud, from standard offerings to full enterprise capabilities for your high performance, high availability workloads including disaster recovery

Security and Quality of Service

FintechOS Cloud

- FintechOS running your solutions using the power of cloud, from standard offerings to full enterprise capabilities for your high performance, high availability workloads including disaster recovery
- Availability up to 99.99%, continuous application and service monitoring
- On-demand scaling of your solution when your business surges
- Data isolation and continuous security and performance monitoring
